-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Specification***

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Objections***

Claims 1-3 are objected to because of the following informalities: the recitation of "characterized" in line 7 of claim 1 is not standard U.S. patent terminology. In claim 1, line 12 and in claims 2 and 3, the recitation of "the said" should either read "the" or "said." In claim 4, line 1, "the location means" should read "locating means." Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 7, 9, 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Lomax (U.S. Patent No. 6,220,290). The patent to Lomax discloses a double block and bleed valve comprising two selectively operable valve arrangements,

Art Unit: 3753

each valve having a port at an end face (6) of the valve body for the reception of locating means to allow the valve to be joined with a pipeline, col. 4, lines 56-62.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 4, 8, 10 and 13-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lomax in view of Rainwater et al (U.S. Patent No. 6,182,696). The valve body end of Lomax lacks disclosing a series of ports at the end thereof. The patent to Rainwater et al teaches the above exception in providing an end face (42) of a valve body with a series of ports to allow a pipeline to be connected to the valve body, see Figure 1. In view of the teaching of Rainwater et al, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the valve of Lomax to include a series of spaced ports at the end of the valve body to allow the pipeline to be connected to the valve body.

### ***Allowable Subject Matter***

Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
